EDUCATION

- University of New South Wales (UNSW Sydney)** - *School of Computer Science and Engineering* Aug.2024 - Present
- *PhD Candidate* in Computer Science and Engineering
 - Supervisor: Dr. Dong Gong
 - Research Topics: Text-to-Image/Video Generation, Diffusion Model Alignment, World Modeling
- Dalian University of Technology** - *School of Information and Communication Engineering* Sep.2021 - Jun.2024
- *Master of Engineering* in Information and Communication Engineering (Artificial Intelligence)
 - Supervisor: Associate Prof. Yi Li
 - GPA: 3.83 / 4.0 Average Score: 91.25 / 100
 - Research Topics: Disentangled Representations, Style Transfer, Image Generation
- Dalian Maritime University** - *College of Marine Electrical Engineering* Aug.2017 - Jun.2021
- *Bachelor of Engineering* in Automation
 - GPA: 4.01 / 5.0 Average Score: 90.00 / 100 Rank: 7 / 123
 - Main Courses: Signals and Systems, Automatic Control Theory, Basics of Computer Software
 - Research Topics: Object Detection, Image-to-Image Translation

RESEARCH EXPERIENCE

- Research Intern, ByteDance** Jun.2022 - Feb.2023
- Worked in the Product R&D (Research and Development) and Infrastructure Department, AI Lab.
 - Cooperated with teams in North America and Singapore to develop and publish special vision effects on TikTok via diffusion models, such as Van Gogh-style rendering and transforming natural scenes into oases or snowy landscapes.
- Research Intern, Chinese Academy of Sciences (CASIA)** Jul.2021 - Sep.2021
- Worked in National Laboratory of Pattern Recognition (NLPR), Institute of Automation.
 - Participated in the Image Semantic Disentanglement for Multi-party Multi-task Collaboration research project, focusing on interpretability and controllability in style transfer.
